

GEORGE J. PAPASIKOS, DMD, FAGD PERIODONTICS (NJ specialty permit #3190)

“The philosophy I live by,” Dr. George Papasikos says, “is to provide my patients with a beautiful smile and a lifetime of oral health.” He is known as an honest, caring, and exceedingly capable periodontist who freely gives each patient his full attention. He offers minimally invasive techniques whenever possible, along with regeneration techniques to help grow gum and bone.

Dr. Papasikos’ new office—with minimal black-and-white décor, leather seating, coffeehouse music, and Hollywood portraits—resembles an art gallery and delights patients. His practice reflects the same attention to detail and aesthetic appreciation.

A graduate of Fairleigh Dickinson and University of Medicine and Dentistry of New Jersey, Dr. Papasikos is a Fellow of the Academy of General Dentistry and an instructor at Overlook, Mountainside, and Morristown Memorial hospitals. He was selected previously as a *New Jersey Monthly* Top Dentist. Dr. Papasikos’ passion for dentistry has inspired his two children to enter the profession.
